DRIVE
Academic Growth for English Language Learners

Exact Path supports the diverse needs of your ELLs through a flexible approach to learning. Students can successfully navigate through Exact Path independently by engaging in scaffolded instruction and practice in their learning paths, as educators utilize powerful data views and teacher resources to efficiently personalize instruction.

Additional accommodation options allow for more individualized support

Learning begins at a student's instructional level, instead of grade level, delivering content via an age-appropriate interface

Listening, speaking, reading, and writing support

A valid growth measure of performance indicates student progress and need for intervention

Exact Path has been approved through the WIDA® PRIME V2™ Correlation process following a rigorous, independent review.

WIDA-TRAINED CORRELATOR

Target different learning modalities

Validated by our WIDA PRIME correlation, Exact Path supports different learning modalities by incorporating listening, speaking, reading, and writing support into individualized instruction.

LISTENING

Assessment-driven learning paths deliver media-rich and interactive lessons.
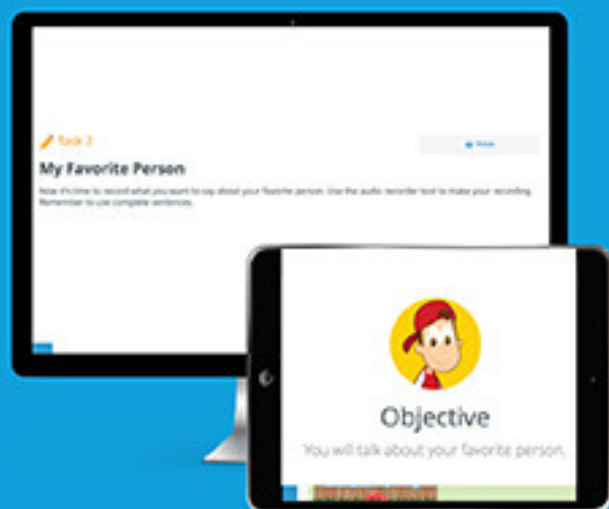

- Lessons include closed captions for videos and instructionally appropriate reading passages.
- Built-in text-to-speech functionality ensures reading passages can be read aloud.
- Students are asked to listen to instructions for each task and complete assignments based on audio content.

SPEAKING

Exact Path encourages students to engage in collaborative discussions and activities and to record verbal presentations to meet rigorous speaking and listening standards.

- A familiar cast of characters engage in discussions and present information to students as they work through their lessons.
- Speaking skills are further developed in optional Teacher Graded Activities and additional offline resources for more comprehensive support.

Target different learning modalities

📖 READING

Exact Path lessons are supported with vocabulary development, reading comprehension, grammar, and word study instruction.
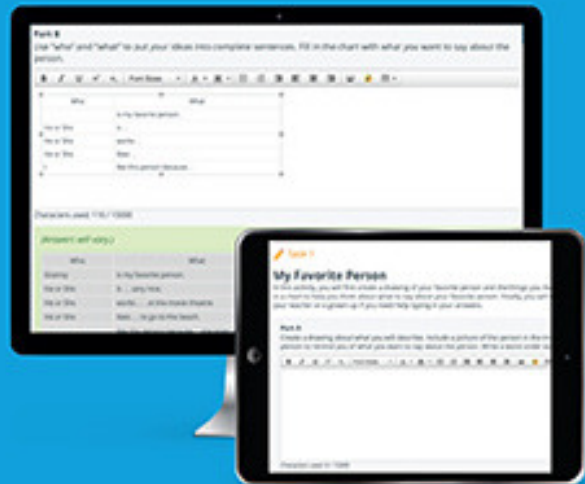

- Reading content includes genres like short stories, nonfiction, biographies, and poetry.
- Reading skills are taught throughout the program in vocabulary, word analysis, phonics, fluency, and reading comprehension activities.
- Vocabulary words are highlighted, and students can use the on-page tools for translation, definitions, and audio support.
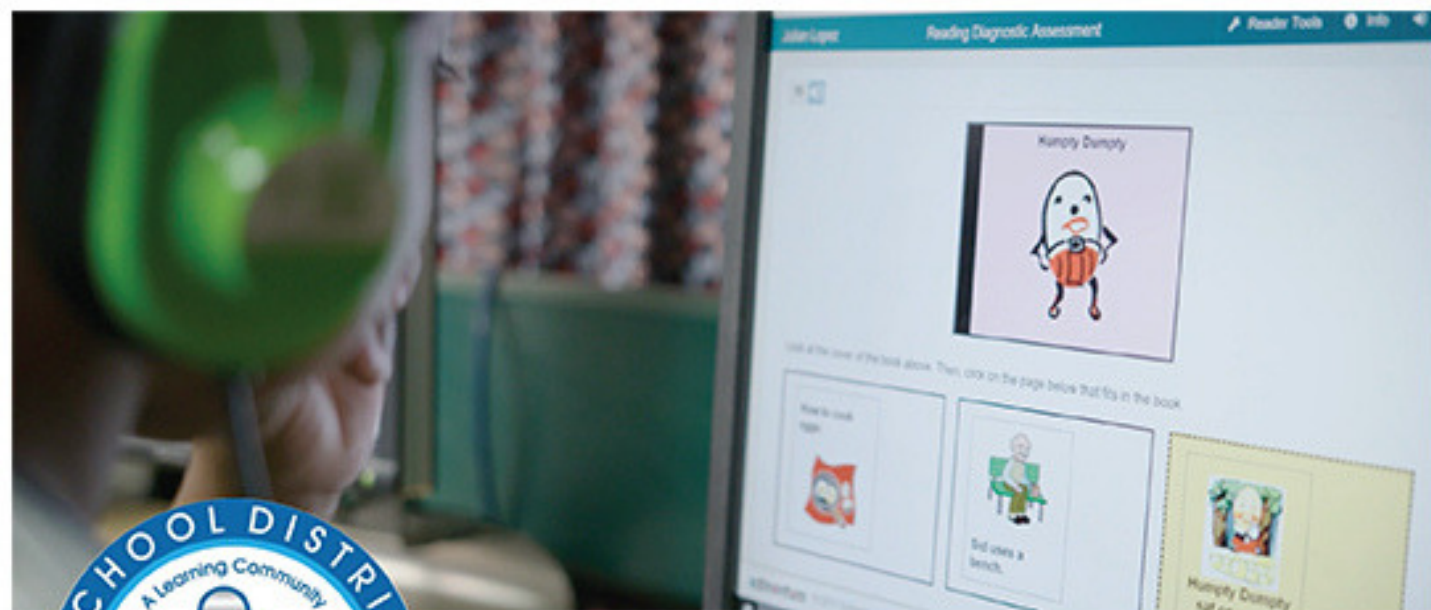

✏️ WRITING

Exact Path fosters development of the writing process by enabling students to practice drafting, revising, and editing written responses.

- Writing skills are reinforced throughout the program as students practice writing sentences, answering questions, and developing written presentations.
- Writing activities are supported with multistep processes that include models and graphic organizers.
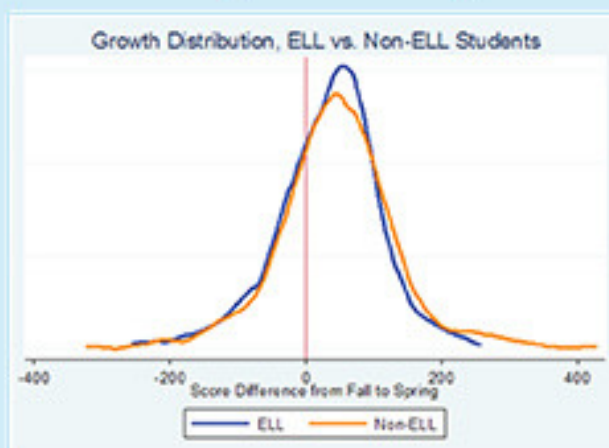

Exact Path Customer Spotlight:
Isaac Elementary School District

Isaac Elementary School District in Phoenix, Arizona, has been using Exact Path for its students during the 2016–17 school year. Within this district, almost the entire student population is Hispanic, and qualifies for free or reduced price lunch, with 40% of the students identified as English language learners (ELLs).
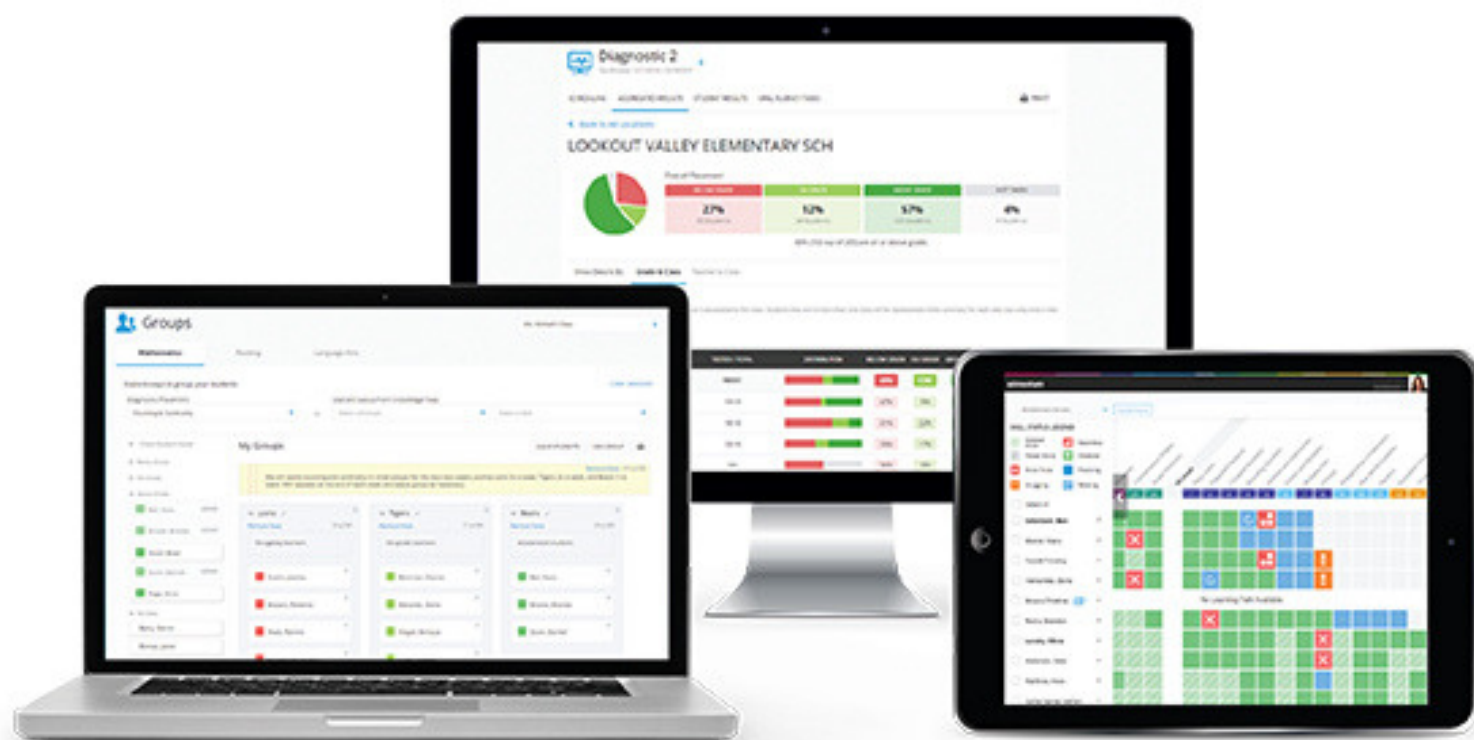

ELL students in this district have made similar academic growth over the course of the school year, as evidenced by comparing their Exact Path diagnostic scores for individual students in the fall and spring. The figure included here compares the distribution of the growth for both ELL and non-ELL students. By comparing the growth distribution of ELL and non-ELL students represented by this graph, it appears that both groups of students made similar progress over the course of the school year.

Growth Analysis for ELL Populations

Growth Distribution, ELL vs. Non-ELL Students

Score Difference from Fall to Spring

— ELL   — Non-ELL

Growth was measured for the 2016–17 school year using Exact Path scale scores. Both ELL students and non-ELL students showed growth over the school year. ELL students show the same range of growth as non-ELLs.

Analyze rich data visualizations and reports

Monitor progress at every turn

- Get both a big-picture view of performance and an immediate pulse on what's happening right now.
- View skill-by-skill performance to formulate next steps and plan for intervention.
- Leverage comprehensive data views for ongoing parent and stakeholder communications.
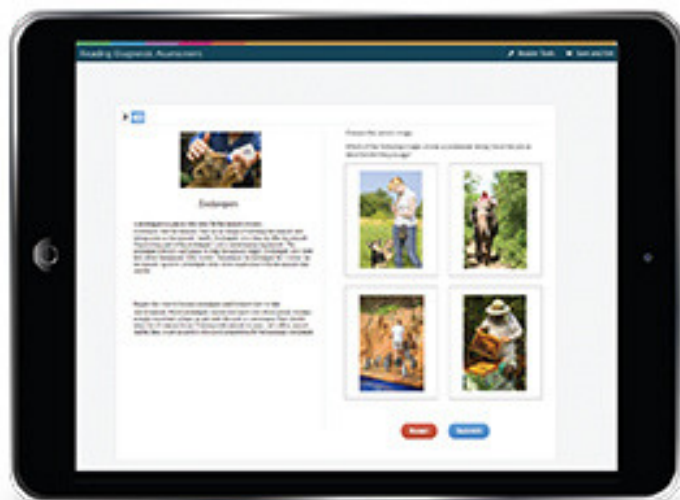

Drive focused interventions

- Identify where your attention is needed the most through built-in notifications.
- Access a variety of teacher resources, including skills-aligned lessons and activities that can be implemented during targeted intervention time.
- Leverage built-in teacher tools to create flexible student groupings to track progress and assign additional instruction.

Deliver rigorous, high-quality instruction

Exact Path's assessment-driven learning progression ensures that students are progressing toward their individual learning goals by offering engaging lessons and activities delivered in bite-sized chunks of no more than four skills at a time.

- Ensure that students are exposed to a student interface and curriculum experience that are both age appropriate.
- Understand student proficiencies and focus on skill gaps through a precise learning path placement.
- Provide students with additional in-product support through tools like text-to-speech, translators, highlighters, and easy login for your youngest learners.

Set individual student goals and motivate ELLs to move forward

Exact Path ensures that students are motivated to meet their unique learning goals with built-in incentive options.

- Recognize grit and mastery with teacher-defined motivational challenges.
- Award mastery and proficiency with built-in mastery trophies.
